 6. Familiar with Agile development, Sprint planning, Daily standups, Refinement, and Retrospective meetings.
- **Personal Interests:**
 - YouTube and Bilibili video creator: Playwright automation testing and JavaScript basic tutorials.
 - Youtube: www.youtube.com/@frankfan5839
 - Bilibili: <https://space.bilibili.com/4064444>
- **Global Team Recommendation Letter:** [linkedin.com/in/之宇-范-1302b62aa](https://www.linkedin.com/in/之宇-范-1302b62aa)

Work Experience

Shanghai Huaruan Information Technology Co., Ltd. (Outsourced to Citi Financial) – Automation Testing *June 2023 – June 2025*

Project: Issuance D7 product – Clearstream

- **Project Description:** Tested a system linked to Clearstream, generating XML files to send to the Clearstream system for successful Issuance -> Increase -> Markup & MarkDown -> Redemption. (Clearstream is a global central securities depository and settlement institution, mainly providing securities settlement, clearing, and custody services.)
- **Responsibilities:**
 1. Requirements analysis and test case writing and review.
 2. Developed automation scripts using Behave + Selenium + Python.
 3. Managed code with Bitbucket and test cases/bug tickets with Jira.
 4. Designed and executed test cases according to different Workflow requirements and Roles, and performed regression testing. Completed project sign-off process.
 5. Identified bugs during development, viewed deployments with LightSpeed, and queried logs from OpenShift to assist developers in locating and verifying bugs. *Other projects can be found at: <https://www.resumefrank.com/个人简历网站下载查看>*

Oracles Information Technology (Shanghai) Co., Ltd. (Outsourced to Citi Financial) – Automation Testing *July 2022 – March 2023*

Project: COMPS System

- **Project Description:** Company loan information recording system.
 1. Deal-Search page: Query deals based on various conditions, select deals to export as PPT or Excel.
 2. Deal-Details page: Insert, Update, Comment Deal.
 3. Deal-Request page: Add, Delete Deal request.
- **Responsibilities:**
 1. Performed web-side functional testing and automation testing (automation work accounted for 70%), with current automation coverage exceeding 80%.
 2. Wrote UI automation scripts using JavaScript + Cypress + Cucumber, executing 400+ Regression Test cases before code upload to Bitbucket release (1 month).

3. Integrated automation test reports into the Fast platform Dashboard for viewing execution results.
4. Conducted bi-weekly sprints and monthly releases, sent BUG LISTs daily during testing weeks, and KPI Reports monthly.

Shanghai Yuantao Information Technology Service Co., Ltd.
(Outsourced to IM Motors) – Automation Testing *September 2021 – July 2022*

Project: IM Motors APP – Event Services

- **Project Description:** Event service application, user roles primarily divided into two categories: car owners and enterprise users. Enterprise users can create and edit events on the web, while car owners can view events on the IM Motors APP or mini-program.
- **Responsibilities:**
 1. Familiarized with requirements and reviewed requirement documents.
 2. Developed app automation using Python + Appium + WebdriverIO.
 3. Performed API automation using Python + Requests.
 4. Regularly maintained automated API scripts, executed regression tests as required, and generated test reports.
 5. Statistical analysis and submission of bugs using the Cloud Effect management platform.

Shanghai Yida Communication Services Co., Ltd. – Automation Testing
September 2018 – June 2021

Project: FASIS System (Business Process Information System)

- **Project Description:** FASIS is a business process information system based on the H5 framework.

Project: FASOMP System (Operations Management Platform)

- **Project Description:** FASOMP system is a B/S architecture operations management system.
- **Responsibilities:**
 1. Participated in test case reviews and requirements analysis.
 2. Wrote test case framework mind maps based on requirements.

3. Wrote and maintained test cases and bugs, uploaded to ZenTao.
4. Performed API testing using Postman based on Swagger API documentation.
5. Wrote API automation test scripts using Python + Requests + pytest.
6. Responsible for functional testing and API testing of the business management system.
